

Technology that respects the architecture.

Integrate intelligent control with the spaces, sightlines
and experience you've designed.

AI-generated concept interior.

MAKE TECHNOLOGY PART OF THE DESIGN CONVERSATION

Preserve clean lines.

Consider controls, speakers and equipment locations early to reduce visible clutter.

Design light together.

Coordinate lighting control and automated shades with daylight, privacy and the plan.

Plan the foundation.

Integrate low-voltage pathways and networking into the home's architectural intent.

Integrated control / Lighting & shades / Discreet AV / Networking

Bring us into the design conversation.

Let's review the plans and the experience you want to create.
